Cease Therapy stands for Complete Elimination of Autistic Spectrum Expression and is a very effective way to treat autism with amazing results! That is Dr. Smits' conclusion after having seen over 300 cases of all levels of severity. In his experience autism is an accumulation of different causes, some of which are due to vaccines, toxic medications and other toxic substances. CEASE therapy uses an individualized combination of isotherapy (a form of homeopathy using the causative substances in homeopathic preparation), Inspiring and/or Classical homeopathic remedies and Orthomolecular therapy to remove any toxic imprints and re-balance the system to bring a return to full health.

The Toronto certification will take place at Victoria College and rooms are available at the college at a reduced rate for those needing overnight accommodations.
